Home communication made simple

*Do you know who is at your front door? With Kocom Hands-Free Video and Interphone Doorphones you will. The Kocom range of hands-free doorphones offer style and simplicity, without compromising on security and features. If you want to look outside at any time, simply press the camera button on the monitor.*

# KOCOM®

When your visitor presses the call button on the door station, the call signal rings on the video doorphone unit. The image of your visitor will then appear on the monitor screen. To speak to them either pick up the handset or press the talk button. To let your visitor in simply press the door release button. Once communication with your visitor is complete, the monitor switches itself off after replacement of the handset, or after 3 minutes.

## Kocom Hands Free Video Doorphones
